

YOUR AMUSEMENT SOLUTIONS

Field Service

SUZOHAPP can provide service contract cover for your equipment or systems, supported by our field service team. Service contract customers have the ability to log calls with our service centre and receive on-site support, with all parts and labour charges covered, for a single annual fee.

No matter if you have a large number of our products, or just one odd note counter to count your daily takings, we can always offer you a suitable type of support.

We offer a range of support options, so let's go through your support needs together. It is possible you have some equipment that is crucial for your business, and therefore might need extra attention than the regular equipment. Our support options can be customised to fit your needs accordingly, which means that you will only pay for what you really need.

We specialize in Coin & Note acceptor reprogramming and Comestero Changer servicing. Perfect for:

- Users that operate equipment on a regular basis and need the equipment up and running
- Users that want an all inclusive support and service package

RGB Ellipse Topper

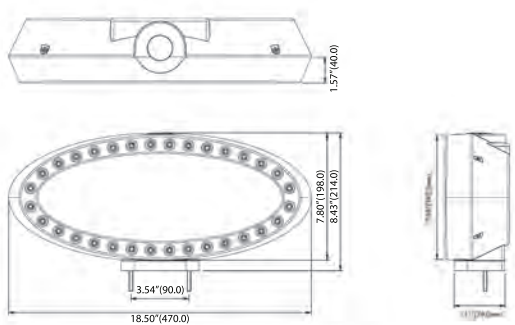

Pictured with Mounting Base & Tower Light
(Sold Separately)

- On board PCB allows stand alone operation or synchronisation of up to eight topper boxes
- Up to 8 toppers can be synchronised using cables
- Toppers can be synchronised to create unique patterns, for example a snake pattern that runs from one topper to the next
- Seven pre-programmed flashing patterns
- Different attract modes including twinkling, full on, rotating left to right and right to left, flashing and more
- Ultra bright LEDs guarantee unequalled light output for a spectacular multi-coloured lightshow
- Backlit by 11Watt SL Lamp
- Translucent bezel contains 40 ultra bright nichia RGB LEDs for a multi-coloured light show
- Whole unit operates on 12VDC power
- Optional flat or radius mounting brackets with two mounting studs available to accommodate different cabinet configurations
- Body is constructed of black uL-94 VO ABS flame resistant plastic, color customisation available
- Tower Light and artwork panel not included

LED Xenon Topper

95-2846-00

104-0025

- Low profile to accommodate locations where ceiling height is a problem
- On board PCB allows stand alone operation or up to 8 toppers to be synchronized to work in a collective pattern
- Toppers can be synchronised using cables to create unique patterns, for example, a snake pattern that runs from one topper to the next
- Made of durable flame resistant uL-94 VO ABS plastics with chrome bezel
- Back lit by 11Watt SL Lamp
- Ultra bright LEDs guarantee unequalled light output for a spectacular lightshow
- Chrome bezel contains 32 bright LEDs
- Seven pre-programmed flashing patterns
- Different attract modes including twinkling, waves, fades and rollercoaster effects
- Whole unit operates on 12VDC power
- Optional mounting base (104-0025)
- Optional blank plexi panel (96-091500)
- Tower light optional
- Artwork not included

Panels For Slot Machines

Superior lighting technology now used in Gaming and Amusement Industry!

CUSTOM SIZES AVAILABLE

- No hot or cold spots
- Illuminates from the sides of the frame and creates a smooth full light without bright spots and shadows that occur with traditional back-lit panels
- Restore your older machines with a new, modern look
- Each model is engineered specifically for the exact application
- Low heat generation saves life of entire machine while significantly lowering air conditioning costs to casino floor
- Light PRO LED panels offer energy savings from 60-80%
- No mercury contamination to the planet and low carbon footprint
- Green energy efficient LED technology
- Available in three shades of white: Warm White, 3500K; Cool White, 5100K; Daylight, 6000K
- 5 year typical lifespan

Flexible SMD Led Light Strip

QL0089

Controller & wireless remote sold separately

QL0064-2

Attract More Attention and Increase Your Earnings!

- Easily installs in or around your machines to provide an updated look to draw more attention and increase earnings
- Great for amusement parks and games, casinos, slot machines, arcades, family entertainment centers, theaters, backlighting, decorative lighting, etc
- Ideal way to increase earnings on your cranes and pushers
- Very thin continuous length flexible LED light strips
- 5m rolls can be separated every 3 LEDs and reconnected again
- Super bright high-quality SMD LEDs per reel with 120 degree wide angle illumination
- 3M adhesive tape on back for easy installation
- Operates on +12vDC power supply (150-0072)
- Solid state, high shock or vibration resistant
- LEDs controlled by controller and wireless remote (sold separately)
- Each controller can run 65.62 feet (20 meters) of LED strips
- Long life: 50,000 hours
- Less power consumption than traditional lights
- No RF interference
- Sold in reels of 5m
- +12VDC; 20W

RGB Controllable Pushbutton

Features

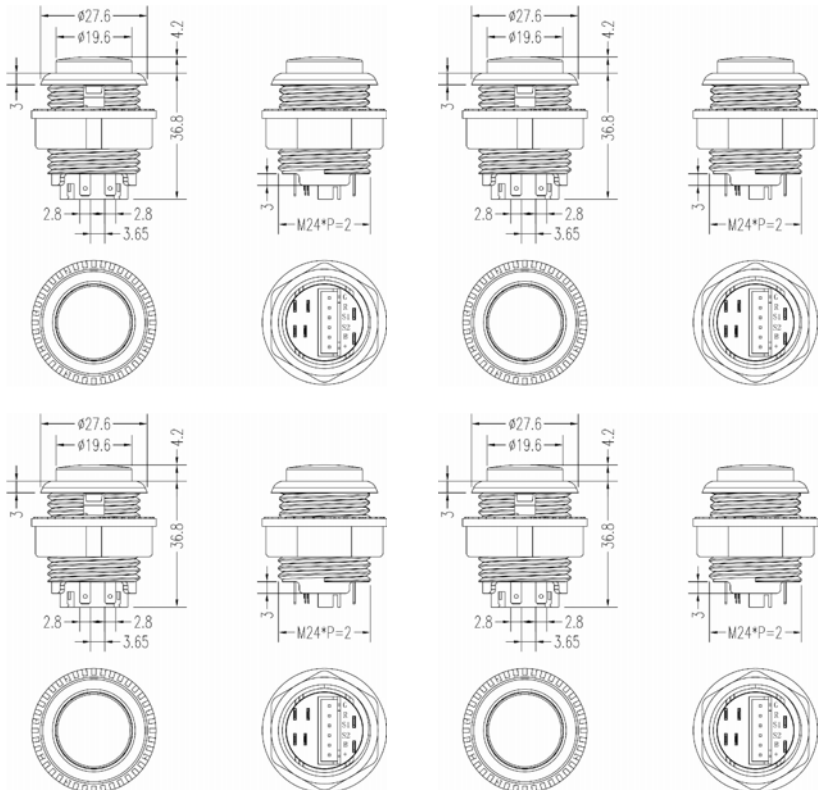

- Built-in RGB LED PCB. It can be controlled by LED driver with constant current output
- Built-in microswitch
- Made with highest quality raw materials
- Suitable to be used for various machines
- Over 10 million times reliability test for microswitch with gilded contact legs
- Button size options: 24 mm, 28 mm
- Connection options: 6pin connector, 110" terminal

24mm

28mm

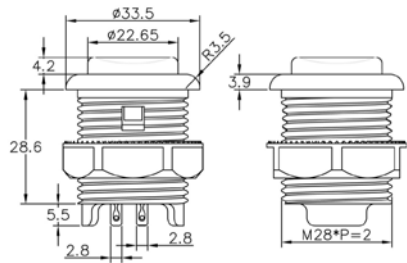

New Concave Round Pushbutton

Features

- Special anti-scratch material. With stunning flashing vehicle baking finish appearance
- Built-in microswitch
- Top quality with a competitive price
- Suitable to be used for various machines
- Over 10 million times reliability test for microswitch with gilded contact legs

BL Locking Style Joystick

Features

- Unique and very attractive round diamond knob design
- Shaft Locking design, easy and quick for installation
- New Shaft design for switchable Knob and anti-stealing functionality
- Special switch/PCB locking design, convenient for service and maintenance
- Made with highest quality raw materials with a competitive price
- Connection types: Switch only, switch with PCB
- Special lighted design (non-lighted model is available)
- Knob options: 43mm diamond ball with bubble, 43mm diamond ball without bubble, 35mm solid round ball (red /black)
- Suitable to be used for various machines

Switch structure

Switch with PCB

Switch with PCB and LED light

BL Spinner

Features

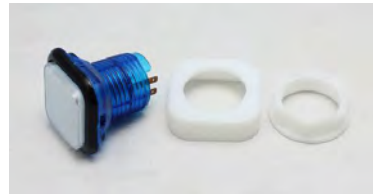

- Whole metal structure, High durability
- Moisture-proof plastic cover design
- Built-in automatic RGB LED lighting effect
- Made with highest quality raw materials
- Suitable to be used for various machines

Square LED Pushbutton With Double Colour Body

Features

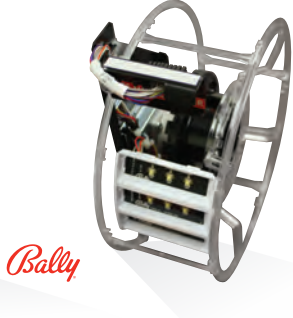

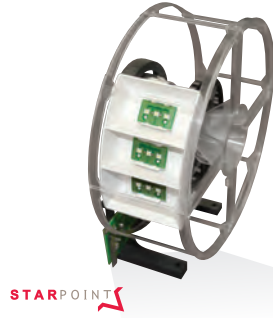

- Two color design. Unique and very attractive appearance
- Built-in lighting LED design with 110 terminals; Long life and easy to use
- Built-in microswitch
- Suitable to be used for various machines
- Over 10 million times reliability test for microswitch with gilded contact legs

Flow Hopper

Large Cup

Intermediate Cup

Medium Cup

New and innovative through hole hopper!

- Perfect for many applications including Amusement, Vending, Gaming, Parking and Change machines
- Constructed of extremely durable, wear resistant plastic along with state-of-the-art electronics
- Available in six interfaces:
 - Parallel
 - Pulse
 - ccTalk
 - DES
 - AES
 - SCH3
- Supplied with quick-fit release plate

Features

- Compatible with other popular hopper devices
- Payout speed of up to 7 coins per second
- Three different bowl sizes available – small, medium and large
- Reliable through hole coin disk design
- Clean design – no external wires run for level sensors
- Integrated fall tube for simple dual hopper cabinet construction
- ccTalk version is available in encrypted and non-encrypted modes
- Parallel interface and standard 10-pin connector
- 12-24V power supply
- Continuous opto-sensor check
- Low level sensor and anti-jam feature

RBM-712 I - D C

Interface Coin Cup Size
Payout Disc

Evolution Hopper

The Evolution Hopper is a great extension to the Hopper line of SUZOHAPP. This belt driven hopper has been re-engineered and the result is an improvement over existing belt driven hoppers in its performance and maintenance. The unique concept provides a single build type hopper that is suitable for 95% of world's coins and tokens without needing adjustments.

The Evolution Hopper is suitable for many applications such as: Vending, Parking, Change, Amusement and Gaming machines. Made from extremely strong, wearing resistant plastics in combination with state of the art electronics resulting in low cost of ownership.

Large DC motor in combination with electronic motor control board for reduced friction and motor noise. Optic board is easily accessible by removing the electronic control board from outside the hopper.

Connector can be easily changed from front to back by just loosening two screws and pulling the cable with connector in its position (reduced inventory for manufacturers that use both styles). Standard parallel interface.

Features

- Modular space –efficient system
- High capacity >1100 coins of 1 Euro
- Pay out speed 4 coins per second
- Built-in agitator to prevent coin jams
- Protected by anti-jam electronics
- Large motor reduces motor noise
- High quality materials for long trouble free operation
- Easily removable and accessible electronics
- Hopper connector can easily be changed from front to back
- Low and high level sensing
- Competitively priced
- Low cost of ownership

EVO1000

RM5 Evolution

Coin Validator

The RM5 Evolution coin validator is known for its undisputed quality and reliability. Its electronics combine extraordinary selectivity with extreme programming versatility: the Cloning system allows the transfer of the configuration parameters from one sample coin validator to another.

Features

- 3 pairs of inductive sensors which are used to process 6 different parameters regarding the material and the mass
- 3 pairs of optical sensors to determine coin's diameter
- A mechanical anti-fishing device
- An electronic anti-fishing device
- An electronic anti "intrusion" device (only for version F)
- Wire cutting blade
- Automatic optical sensor compensation system for variations in temperature, voltage and lighting
- Identification channels: up to 59, each of them can be redirected to the outlets. The first 6 support Self-Prog mode
- Open collection outlets
- Serial interface for external connections (portable programmer or PC) for calibrating and testing, as well as for updating the value and operating parameters tables
- Credit recognition: parallel, binary, pulse
- Also available in tropicalised version to be used in environments affected by adverse weather conditions

Programming kits

PC Based

Handheld

RMPRCHRM5STARUK (Evo)

RM5 HD

Coin Validator

Coin validator equipped with HD high discrimination system. 3 types of sensors and 10 coin validation parameters. Advanced electronic and mechanical anti-fraud system.

Features

- HD high-discrimination system based on 10 different parameters regarding: frequency, dimensions and phase
- 5-sensor identification technology: 3 inductive sensors, 1 optical sensor and 1 magnetic sensor
- High acceptance speed: 6 coins per second, even of different values
- Compatible with all coin sorters available on the market
- Advanced electronic and mechanical anti-fraud system: electronic antifishing device, coin movement direction detection, 3 mechanical traps, and wire cutting blade
- Indicator LED

The IDEAL™ Cashless Amusement Solution

IDEAL Cashless System uses debit cards for games, attractions and other purchases

Increase revenue by going cashless!

Customers tend to spend more when they don't have to make a buying decision each time they play a game or choose an attraction. Incentivise a larger up-front purchase by allowing your guest to load up a debit card that can be used anywhere in your facility, including any Point-of-Sale location. Ideal makes it easy and operations become much simpler.

You get more ways to drive business, including Time Play, Lock Ins, and Packages. Check out the different elements of the Ideal Cashless System, including Game Card Readers, Access Control Enclosures (for use with or without turnstiles), and Kiosks (automated card purchase/recharge stations).

Benefits of the ideal Cashless System increase revenue

- Customers spend more up front
- Customers play more freely once value is on the card

Flexibility

- Set prices in smaller increments than a quarter
- Adjust prices automatically in peak/off peak times
- Entitlements let you give rights to certain attractions
- Packages can be loaded on cards with entitlements and cash
- Supports free play, time play and discounts
- Supports cashless food and beverage service at POS locations
- Cash controls are absolute - cash added is accounted for

Actionable Reports

- Extensive reporting by site or by attraction
- Receive revenue snapshots via email or access on your phone

IDEAL Self Service Kiosks

Kiosks that sell cards and add value using cash, coin, or credit card, and register cards and show history. Ideal kiosks increase sales while simultaneously reducing labour costs. Increase your income by offering customers a self serve, always available means of purchasing or recharging game cards.

Ideal kiosks can be themed with custom graphics to compliment your facility's overall look and feel. It uses a large touch-screen colour display for the best guest experience. It accepts notes, coins (optional) and credit cards. It even prints receipts. The Ideal kiosk not only sells and recharges cards, but also allows you to view your purchase/play history, register your card (adding customer data to your marketing database), and can be configured to sell attractions and packages.

IDEAL RFID Bands

Radio Frequency Identification Device

Dramatically increase the efficiency and security of any type of amusement facility by taking advantage of the benefits that RFID can provide for cashless point-of-sale, vending, access control and other guest applications. Ideal Software Systems is the choice to help your business take advantage of this technology.

The benefits of RFID are obvious: no card, ticket or wallet is necessary for customers to have full access to ALL of the amenities in your facility.

IDEAL POS

Simply the Most Complete Amusement Business Point-of-Sale System Available

- Cashless Card System
- Redemption
- Online Event Registration
- Party Scheduler

Ideal POS is the most user-friendly and versatile software programme in the amusement industry today. Ideal pioneered the use of software to manage and operate Family Entertainment Centers (FEC) while developing and installing the first systems in 1983. We had installations long before others were even in the industry. Ideal POS is the foundation for your One Ideal Solution™.

To build your complete One Ideal Solution™ to manage your entire facility, we offer the most comprehensive set of software modules (e.g. Party-Scheduling, Redemption, Debit Card System, Capacity Management, eCommerce, Bowling, PDA Apps, etc.) that integrate seamlessly with your Ideal POS.

From the get go, you will never have to worry about outgrowing your current system or needing any other system as Ideal will have the best solution for your current and future business needs. Being a software company, Ideal continually invests in its software R&D and partners with industry-leading software vendors (e.g. PCCharge and TimeClock Plus) to offer you the best of breed and industry-changing solutions.

IDEAL RCM

Redemption Center Manager

Ideal Redemption Center Manager (RCM) moves customers quickly and efficiently through the redemption area, solving one of the biggest challenges in any Family Entertainment Center (FEC). Ideal RCM dramatically improves customer service at the redemption counter by enabling up to 4 attendants to effectively serve up to 15 customers at one time. Ideal RCM has the most complete inventory software on the market along with advanced control features. Ideal RCM reduces labour costs while eliminating long queues and confusion at the redemption counter. In addition, Ideal RCM helps operators supervise and manage receipts, internal transfers, redemption, refunding, and inventory reporting of inventory.

Benefits of Ideal RCM

- Maintains vendor information
- Automatically calculates points values
- Guests can bank unused points into their own personal savings account or receive a bar-coded voucher for future use

Control

- Integrates with scales and ticket eaters
- Electronic inventory and processing controls

Actionable Reports

- Provides re-order reports based on sales history
- Anyone can generate actionable reports

SMART HOPPER

The Smart hopper from Innovative Technology brings coin payment technology into the 21st century. Ideal for all machines, the Smarthopper eliminates the need for multiple hoppers, sorters and reduces the cost of handing coins internally.

DA3 KIT

DA3 Validator Programming System for use on-site / in the field.

NV200

The NV200 bank note validator accept bank notes up to 85mm wide and standard industry bar codes. The NV200 is a secure and filed proven bank note validator. With a lockable, removable cashbox that can hold up to 100 notes, and add on recycler unit (Smart Payout) is available to allow mixed denomination note recycling.

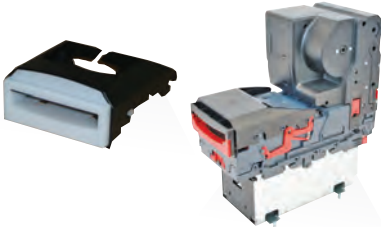

NV9 USB+

The NV9 USB+ has been developed to incorporate programming via a configuration button or configuration card and includes USB capability and advanced note guidance technology.

NV10 USB+

The NV10 USB+ has been developed to incorporate programming via a configuration button or configuration card and includes USB capability.

NV11+ NOTE FLOAT

The NV11+ is the latest model from Innovative Technology, incorporating a bank note validator and 'Note Float' payout unit. With a 30 note capacity of one single denomination, the NV11+ is capable of dispensing notes as change or prizes, helping to relieve the possibility of coin starvation and keep machines running.

NV12+

The NV12+ is a revolutionary compact validator and ticket printer that dramatically reduces operational costs by eliminating hopper starvation and reducing cash handling tasks.

Crane Payment Innovations

NRI v² EAGLE

The v² eagle coin validator is setting standards within the payment systems industry. By using the unique MFT validation technology and additional sorting control sensors, outstanding coin security is guaranteed. The v² eagle is fully compatible with Money Controls SR5i applications and all NRI G-40 applications.

HEARTBEAT/WINEAMP

Programmer

COMPACT HOPPER

The Compact Hopper does exactly what the name says, providing a large capacity with a small footprint. This makes it ideal for many applications including retrofit. The Compact range offers high security and high speed for single denominations.

v² COLIBRI

The v² colibri is Crane Payment Solutions newest 3.5" coin validator. With input from the NRI and Money Controls brands, this validator offers best-in-class MFT coin validation technology for the highest coin security and is compatible with all SR3i and NRI G-13 applications.

ASSA DESMO LOCKS

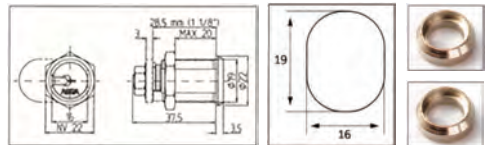

The World's largest manufacturer of locks, ASSA has developed the Assa Desmo as its top of the range camlock product. With many of the world's largest casino groups as customers, the product has become a standard of any casino operator who insists on maximum security combined with maximum operating comfort. The launch of the RC (removable core) version has made this line complete; the casino has now both maximum security and economic handling in one product. Assa Desmo is a patented lock construction based on direct drive pins (no spring operation) making it particularly suitable for dirty conditions and hostile environments. False cuts on the pins provide resistance to any currency known method of picking. A large key made from nickel silver provides many years of guaranteed comfortable handling. The Assa Desmo system is the most effective way to prevent unauthorised manufacturing, cutting and distribution of key blanks. It also requires the most advanced and precise cutting equipment in the lock industry. No Key blank for Assa Desmo are sold and key production for Europe is only done in Sweden.

Features

- 8 pin lock combined with two strong side bars (6 pin for RC series)
- Patent protected against unauthorised key duplication
- False cuts on the pins provide resistance to any currently known method of picking
- Large key made from nickel silver for lasting durability and comfortable operation
- Standard 90° operation and key removable in locked position, optional available with removable key in either locked or unlocked position
- Various collars available to adjust the mounting depth
- Switch locks available in the same keycode as standard camlock
- Supplied with standard 32mm cam. Other sizes and models available

GEMATIC LOCKS

Gematic locks are available in sizes:
 16mm (5/8"), 22.3mm (7/8") and 28.6mm (1-1/8")
 Sold in minimum quantities of 50 Complete with 5 sets of keys

- F8GS1058 Gematic lock 16 mm (5/8")
- F8GS1078 Gematic lock 22.3 mm (7/8")
- F8GS1118 Gematic lock 28.6 mm (1-1/8")

Locks & Security Bars

SWITCH LOCK

10 pin operation lock with 2 keys

- 10 pin operation
- Die cast housing with chrome finish
- Length 36.4 mm (1-7/16")
- Large key provides good grip during operation Key made of nickel silver material for trouble free performance
- Switchlocks have 6.3 x 0.8 mm terminals fitted for easy connection
- Key different locks are supplied with 2 keys per lock
- Switchlocks are available with or without automatic key return

MINI BAR HASPS

Standard 4-1/2" Mini bar Hasp
30-1006-00

Specially designed for all types of Coin Operated equipment

Touch Monitors

Brilliant Display. Superior Quality. Competitive Price.

Engineered and designed specifically to perform in some of the most demanding, high-touch environments, the 90-Series open-frames feature touch technology that is built-in rather than bolted-on. Enjoy unsurpassed quality and reliability in any setting-at an attractive price point!

- Wide range of sizes-from 10" to 27"-to fit your environment
- Next generation Projected Capacitive (PCAP) 2GS (two glass solution) technology delivers both a ten touch "tablet like" interactive experience along with thru-glass functionality both modes support single or dual latex gloves as well as cloth gloves and provide durable performance in high traffic settings
- Projected Capacitive (PCAP) units pass UL Ball Drop test and IK07
- Purpose-built, open-frame architecture for hassle-free installation and cable management
- Common electronics and mechanical design across all sizes including VGA, display port, serial, USB type B, RJ45 - OSD remote controller
- Drop in replacement with backwards compatibility allows for plug-and-play replacement of existing units – (X,Y dimensions and mounting are the same as current products – Z dimension are the same or thinner)
- Seamless, edge-to-edge glass touch displays provide modern, true flat designs without compromising brightness, optical clarity or response time
- LED back-lighting reduces power consumption and creates slimmer designs

Upgrade Your Current Open-Frames to the NEW90-Series

SUZOHAPP carries more LCD Monitors IN STOCK than all of our competitors combined

CUSTOM LCD / TOUCHSCREEN SOLUTIONS

- 15" / 17" / 19" LCD MONITOR
- Units work in CGA, VGA, SVGA or XGA resolutions
- Ideal for use in most Amusement applications
- Replace your old outdated CRT monitors with a Vision Pro LCD and give your games a new modern look

Lumia & Protec

Available with Charge'N Play

'LUMIA' RGB INFILL PANEL

Features

- Pleximilchglas with RGB LED lighting and remote control
- High quality soldering iron stand
- Front panel can be easily removed (3 screws). Different colours adjustable, as well as various flash modes and a colour change programs
- Very discreet, non-glare lighting
- Dimensions: 95cm x 35cm x 47cm

30-0010RGB

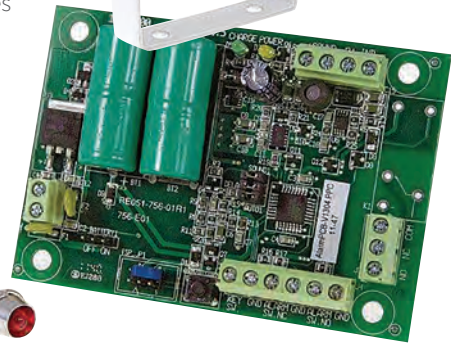

PROTEC Alarm System

Features

- Easy Installation
- 12/24v DC operation
- Battery Back up
- Uses accelerometer - no external Tilt Switch necessary
- Automatic arming (if required)
- Suitable for all Amusement, Gaming & Change Machines
- External LED indicator
- Spares available upon request

189-1000 Protec Alarm system

189-0204 Relay for Protec Alarm

SC-8220 NOTE COUNTER

- 1.5 Pocket Value & Multi Currency Counter
- The SC-8220 comes with a preset of around 20 currencies
- Counts total mixed notes
- Multi Currency mode
- Detects counterfeits
- External UV lamps

SC-1600 SERIES

- Counts up to 1,500 notes per minute
- Available in different security levels and note recognition modes (UV, MG, IR, 3D)
- Also available as SC-1610 Euro Value (ECB approved)
- Small footprint and handle makes it easy to place in many environments
- Can be connected to the software for further data handling

DTC-1

- Compact and light value counter for mixed coins
- Counts up to 32 different coins with dual currency option
- Easy operating and maintenance that require very little training for operators
- Equipped with sensor technology
- Optional dual currency mode
- Can be connected to the software for further data handling

DTC-9

- 9 pocket value sorter for mixed coins
- Counts up to 32 different coins with dual currency as option
- Easy operating and maintenance that require very little training for operators
- Equipped with rail sorting technology which makes the machine extremely easy to upgrade (for example for coin reforms)
- Equipped with the sensor technology
- Can be connected to the software for further data handling

SC-303

- Compact, silent coin counter (up to 2,700 coins per minute), ideal for banking, retail and amusement
- Counting, bagging and tubing
- Pre-programmable batch stops
- Handle for easy transportation
- Easy to read led display

SC-350 / SC-360

- Coin counter ideal to fit the gap between heavy duty machines and smaller back-office machines (counts up to 3,000 coins per minute), ideal for banking, retail and amusement
- Equipped with standard RD/AuX for external display and foot control and serial interface for possibility to control machine from PC
- Counting, bagging and tubing
- Pre-programmable batch stops
- Easy to read led display
- SC-360 has a standard hopper for 6 litres of coins

When Speed and Accuracy Matter

An exciting contender to make an entrance into the cash solution 'ring', the ICX Active-9 is perfect for medium sized businesses, especially those wishing to process medium volumes of coin without having to worry about reliability and capability.

Features

- Process multiple currencies
- Adding multiple coins in the same bag
- Bag switching
- Multiple set-ups
- Configured in software
- Highest throughput and efficiency

For Medium Coin Volumes

It is a competitive mid-range coin solution for customers who receive a reliable, robust machine, but also benefit from fantastic value on investment.

The ICX Active-9 is the perfect solution for customers who manage medium volume of coins, but need the reliability and outstanding features of the ICP Active-9.

Latest Design With Proven Best-In-Class Technology

This new design is developed through listening to our customers and adapting to match their needs. Furthermore, the solution has a 10" LCD touchscreen display for quick operation where the user can easily change the set-up of denominations and keep track of the cash management data in order to develop their business further.

The ICX Active-9 features the same firmware as the strong ICP Active-9 platform with the unique, software-controlled Active Sorting® technology. It has the ability to re-program sensors which provides the intelligence necessary to instantly adapt to future regulatory needs without having to invest in new hardware.

Key Product Features

- Basic dimensions (WxDxH*): 770 mm x 614 mm x 547 mm (30.3" x 24.2" x 21.5")
- Active Sorting®
- 9 coin outlets plus 1 for rejection
- Processing up to 2,700 coins per minute
- 10" touchscreen user interface
- Low power consumption
- Either desktop or standalone solution
- 3 USB for accessories or peripherals
- One ethernet port for networking
- Additional input and output for accessories
- Coin outlets are spaced identically to the ICP Active-9 and SC-4000
- Configuration by standard P-5000 service program

SWING

Solid and compact coin/banknote change machine. Free standing armoured cabinet. Refill key. SD-card for programming, upgrading fw and exporting accounting data. Coin capacity: 3,000 1€ coins

Banknote capacity:
70 (in the recycler) + 500 (in the cashbox)

SMART EASY

Coin change machine equipped with multi-coin hopper. Accepts up to 6 coin values. It can be installed on a base, on a support countertop or wall-mounted.

SD-card for programming, upgrading fw and exporting accounting data.

Coin capacity: 3,000 1€ coins

BRAIN

Thanks to Brain, one or more machines may be networked and remotely controlled via PC or tablet and notifications can be received on your smartphone. With a simple connection, you can access all the information concerning on board accounting, alarms and the master data you manage.

EASY PRO

Compact coin change machine. It dispenses one type of coin/token. It can be installed on a base, a countertop or wall-mounted. SD-card for programming, upgrading fw and exporting accounting data.

Coin capacity: 2,400 1€ coins

TWIN JOLLY PRO

Sturdy and reliable coin change machine. It dispenses two types of coins/tokens. Free standing cabinet. SD-card for programming, upgrading fw and exporting accounting data.

Coin capacity: 6,800 1€ coins

DUAL COIN PRO

Sturdy and capacious coin change machine. It dispenses two types of coins/tokens. It can be installed on a base, on a support countertop or wall-mounted. SD-card for programming, upgrading fw and exporting accounting data.

Coin capacity: 7,000 (1€) coins

JOLLY PRO

Slim and versatile coin change machine. It dispenses one type of coin/token. Free standing cabinet. SD-card for programming, upgrading fw and exporting accounting data.

Coin capacity: 3,400 1€ coins

Seating

ZENITH

ADJUSTABLE HEIGHT SWIVEL CHAIR

- Eco leather fire-retardant, water-proof, stainproof (certific 300,000 cycles anti-abrasion)
- Padded ergonomic polyurethane foam to varying hardness
- Base: chrome diam.500 mm conical reinforced steel
- Swivel and up & down 58 cm to 84 cm (suitable for both slant top and high cabinet both)
- Base is 55 diameter - maximum height of backrest is 103 cm (minimum) and 128cm (maximum)
- Seat Auto-return 360 degree with auto-centring breaking friction
- Finished chromium
- Exceeded the following tests and certifications: durability test, seat and back drop test, footrest fatigue resistance, resistance to fatigue armrest, stability test

ZENITH4

- Eco leather fire-retardant, water-proof, stainproof (certificate 300,000 cycles anti-abrasion)
- Padded ergonomic polyurethane foam to varying hardness
- Base chromed steel in 4 legs
- Finished chromium
- Exceeded the following tests and certifications: durability test, seat and back drop test, footrest fatigue resistance, resistance to fatigue armrest, stability test

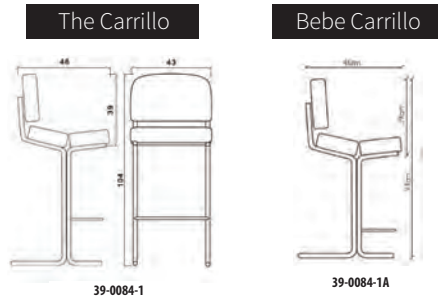

Seating

The Carrillo

- Eco leather fire-retardant (certificate 300,000 cycles wear resistance)
- Padded ergonomic polyurethane foam to varying hardness
- Structure in reinforced steel with welding anti-break
- Finished chromium (three chromium)
- Available in height 73 cm for high cabinet or 55 cm idea for slant top
- Exceeded the following tests and certifications: durability test seat and back - drop test - footrest fatigue resistance resistance to fatigue armrest - stability test

Available in two sizes

2 WAY COMPACT SPEAKERS

Part No: 22-0231

- 2 Way plastic sealed box
- 3-1/2" Mica cone foam edge woofer
- 13mm PEI dome tweeter
- 120 Watts peak power
- 30 Watts RMS
- Frequency response: 75-22.000Hz
- H195 X W130 X D105

Part No: 22-0232

- 2 Way plastic sealed box
- 5" Mica cone rubber edge woofer
- 13mm PEI dome tweeter
- 160 Watts peak power
- 40 Watts RMS
- Frequency response: 65-22.000Hz
- H241 X W180 X D150

Part No: 22-0233

- 2 Way plastic sealed box
- 6-1/2" Mica cone rubber edge woofer
- 13mm PEI dome tweeter
- 220 Watts peak power
- 55 Watts RMS
- Frequency response: 50-22.000Hz
- H288 X W215X D170

Part No: 22-0234

- Impedance: 6 ohm
- 90 Watts peak power
- 60 Watts RMS
- Frequency response: 65hz - 20KHz
- H280 X W220X D170

- Cost efficient
- Made from strong, durable, impact - resistant plastic
- Stack easily, won't stick
- Available in 2 sizes
 - 300cc (D=100mm , h=60mm)
 - 500cc (D=115mm , h=70mm)

- 39-0540 Cupholder for 500cc cups x 500
- 39-0541 Cupholder for 300cc cups
- 39-0528 Good Luck Coin cup x 500
- 39-0529 300cc Coin Cup x 1000

Artscape™ is high definition, digital imaging onto premium grade, spill protected pool table cloths.

Using our expertise and leading edge technologies we print unique, photo realistic designs coordinated across the bed and cushion rails. Artscape™ imaging is available on cloth made for both American and English pool. All our fabrics are manufactured to the highest quality and durability.

We have over 100 years experience in the manufacture of pool and snooker cloths. We possess the unique ability to process the printed cloth through our finishing technology to achieve the perfect playing surface whether this is a fine worsted or a fine napped finish.

Artscape pool cloths can increase table revenue by up to 40% and offer the complete solution; each is made to measure, individually packaged and easy to fit.

Our designs do not affect cloth performance or play characteristics and maintain cloth appearance for longer by minimising the effects of wear.

Pool & Snooker Balls

Saluc produces and distributes billiard balls under the registered trademark Aramith in more than 85 countries, and has a market share of 80% worldwide. The company is also specialised in the production of industrial balls used in all kinds of applications, as well as in 9 pin bowling balls and trackballs. Export represents 98% of its activity. One of the major strengths of the company is its upstream integration: Saluc has its own chemical plant, which produces the phenolic resin which gives the exceptional characteristics to the finished products. This integration allows the price optimization and quality insurance. The Aramith phenolic balls last up to five times longer than other balls made of polyester," said Yves Bilquin, sales and marketing manager for north America and previously the R&D manager. SUZOHAPP is a distributor and stockist of Aramith products, the full range is available although some of the less standard items may require lead times and stock.
