## SUZOHAPP getting ready for a great Vendiberica

SUZOHAPP sends out a warm welcome to attendees of the upcoming Vendiberica that will take place at the IFEMA exhibition center in Madrid between the 18<sup>th</sup> and 20<sup>th</sup> of October. SUZOHAPP will be showing its vast selection of solutions for cash and cashless management at **Stand 4 C01**.

In coin handling, the focus will be on the **Currenza C<sup>2</sup> coin recycler**, which is a household name in the industry with its array of unique benefits. Thanks to the PRP (Payout Redundancy Protection) system, six tubes and three independent motors, it reduces downtime and guarantees maximum security in every application. For vending applications where only coin acceptance is required (for example, table-top vending machines), the Comestero **RM5 coin validator** is the ideal solution. With over one and a half million units sold worldwide, it ensures optimal acceptance of true coins and rejection of false or fraudulent coins, as well as maximum security against any possible manipulation attempts.

SUZOHAPP has an ever-growing range of cashless payment solutions. **WorldKey** is the most complete and reliable cashless line in the market. It offers many new features, such as Age Detector, Day Free Vend, wallet expiration, QR code reader and credit card reloading. The WorldKey range continues to expand and today SUZOHAPP is proud to offer the new **WorldKey Loyalty** platform, the online solution that allows operators to communicate directly with end users and develop loyalty programs. SUZOHAPP expertise in cashless solutions will also be highlighted through the **P6 series** which is the latest generation of credit & debit card payment terminals for vending applications. These advanced devices enable payment using contactless, chip or magnetic stripe, as well through a smartphone using Apple Pay or Samsung Pay.

Vending operators are faced with the challenge of counting and sorting many coins and often banknotes, as well. Traditionally, cash is manually processed, which is a very labor intensive operation. Thanks to SCAN COIN back-office solutions, operators can optimize the flow of cash from the machine to the bank, so costs are reduced, high level reporting is provided and security is improved. At Vendiberica, SUZOHAPP will showcase the **CDS-7 deposit solution** and traditional coin & note counters, such as the **DTC-9** for coins and **SC-8220** for notes.

Luis Fernandez, SUZOHAPP Sales Manager in Spain, commented “Vendiberica promises to be an exciting show! We have decades of experience in cash and cashless payment technology – whether as individual components or complete solutions. We invite all visitors to come by and see how to grow their business.”

### About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement. SUZOHAPP's solutions include cash deposit, recycling, processing and payment systems as well as a broad range of self-service component technologies.
