## SUZOHAPP to bring the future of cash management to NRF 2018 Transform cash handling operations with CashComplete™ solutions

SUZOHAPP will be exhibiting at the upcoming NRF 2018 from January 14-16 at the Jacob Javits Convention Center in New York, NY. This year's theme is retail transformation and will preview bold new directions that will help players in this industry compete and succeed in a constantly changing market. SUZOHAPP will be at **Booth 3952 (Level 3)** presenting its next-generation cash management solutions.

Handling cash manually is a time consuming task for retailers. It should be a fast and simple process with minimal human involvement, providing optimal accuracy. SUZOHAPP helps automate all cash processing, switching the focus from cash management to value creation.

At the SUZOHAPP booth, visitors will learn more about the CashComplete™ product line which consists of a comprehensive range of Cash Deposit, Cash Recycling and POS integrated solutions for both back office and front office environments. These unique systems are scalable and can also be tailored to meet retailers' needs. SUZOHAPP experts help customers choose their ideal combination of units, always connected to the software platform CashComplete™ Connect which offers superior financial and operational control of cash.

To be launched at NRF is SUZOHAPP's latest innovation - the SDS-35. This new advanced deposit solution streamlines and automates the cash handling process, storing banknotes effectively and securely in high volume retail environments. The SDS-35 reduces shrinkage and number of touch points in the processing of banknotes.

Other displayed solutions are the CashComplete™ SDS-600 and the SDS-750, compact and versatile deposit systems that provide a cost-effective method of securing bank notes which increases accuracy and cash visibility. The SDS-600 has the capacity to handle the depositing needs of an entire franchise, but comes with a small foot print. The SDS-750 is known for its high speed capacity, strong reliability and cutting-edge technology.

The CashComplete™ RCS-100 and RCS-500 & RCS-600 are complete cash recycling solutions that allow you to take control of cash through an efficient cash cycle in all areas of business, from internal cash handling to CIT operations. They automate your cash handling, allowing you to retrieve real-time cash flow data from your computer or mobile device whenever you need it.

Ron Partridge, President of SUZOHAPP Americas, is looking forward to welcoming visitors. "We are excited to participate again at NRF and meet all our valued customers," said Partridge. "Join us and discover how our CashComplete™ solutions can minimize the time you spend dealing with cash handling challenges and maximize your return on investment!"

## About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement.
