SUZOHAPP to present the Perfect Payment Trio at Venditalia

"We are excited to attend the upcoming Venditalia which will take place in Milan from June 6th through June 9th," stated François Profit, Executive Vice-President EMEA - Automated Services. "This year, we will present the perfect combination of payment systems to the vending market."

With its recent acquisition of Coinco product lines, SUZOHAPP extended its Vending portfolio with a range of innovative payment solutions that includes the Vantage banknote validator. "**Vantage, Currenza C²** and **WorldKey** are the perfect payment trio for all vending machines, as they guarantee maximum flexibility in payments and high transaction security," commented Luca Rossato, Sales Manager for Vending in Italy.

Thanks to the PRP (Payout Redundancy Protection) system, the Currenza C² coin recycler is the ideal solution for coin acceptance and payout. The Coinco Vantage bill validator is an industry-leading solution with a host of advanced features for highest in-service time. It will be presented at Venditalia in its brand new look. Last, but not least, is the WorldKey system which is the most complete and reliable cashless range in the market.

"At Venditalia, we will also show the **WorldKey Loyalty** platform, an on-line solution that allows operators to communicate directly with end users and develop loyalty programs," explained Stefano Rostellato, the new Sales Manager for Vending in Italy, alongside Luca Rossato. "We will present a new and interesting feature of this online platform: the credit recharge of Mifare[®] media directly online." For cashless payment technology, visitors will also learn more about the **P6 series**, a new generation of credit and debit card readers.

The new **E-PRL** electronic reprogrammable lock will stand out at the SUZOHAPP stand. This patented high-tech locking system offers more than 10 billion possible combinations and is the ideal solution for access identification and control. "At Venditalia, we will introduce the new Bluetooth model which allows online control of authorizations/accesses and keeps track of transactions, even from a smartphone or a tablet," explained Profit.

The new SCAN COIN **ICX Active-9** will also be presented in the SUZOHAPP stand. This innovative coin sorter represents the new mid-range class of sorters and offers invaluable support to operators in their day-to-day operations. Equipped with a 10" touch screen interface, it can sort up to 9 different coin types / tokens at a rate of up to 2,700 per minute. An additional solution displayed at the SUZOHAPP stand will be the reliable Comestero **Easy PRO** change machine.

"Make sure you visit our stand (**E55 F52, Hall 3**) and see our latest innovations!" concluded Profit.

About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world.
