## SUZOHAPP at the forefront of cash management innovation at EQUIPMAG

SUZOHAPP is excited to participate again at EQUIPMAG, the must-attend French tradeshow for retail organizations, featuring the most innovative solutions to help retailers create, redesign, manage and optimize their business. The event is set to open its doors between the 10th and 12th of September in Paris, France and SUZOHAPP will be exhibiting at stand M092.

Cash is still one of the most common payment methods which requires retailers to find a way to handle it efficiently. At this year's EQUIPMAG show, SUZOHAPP will show how to transform cash handling into a completely automated process, by presenting two brand new CashComplete™ solutions, produced specifically with the priorities of retail businesses in mind:

- **CashComplete™ RCS-400 2.2**, a Recycling Cash Solution which streamlines your cash handling with automated till float creation, coin recycling, change facilities, and end of shift deposit and reconciliation. The new 2.2. version comes with a flexible system for different tills.
- **CashComplete™ SPS-700 & SPS-800**, the next-generation Smart POS Solutions which leverage best-in-class technology from the successful CashComplete™ SPS-500 & SPS-600, recycling note & coin systems that have become the benchmark for complete POS automation, securing cash and reducing counterfeits in the check-out lanes.

All CashComplete™ solutions also offer real-time data and remote monitoring with the new CashComplete™ Connect monitoring software, a cloud-based platform which allows customers to fully monitor their cash and generate accurate reporting for complete visibility of the cash cycle.

Also in the SUZOHAPP booth, great focus will be placed on the SCAN COIN CDS-820j, an advanced Cash Deposit System and the CashComplete™ SDS-300, a Smart Deposit Solution that provides a cost-effective method of securing banknotes. At the SUZOHAPP booth, visitors will also learn more about the SCAN COIN desktop solutions (DTC-9 and SC-8220) and the Comestero Multi Pro change machine. A rich selection of cash handling equipment will be showcased, such as coin hoppers and validators, bill validators (MFL) and recyclers (Bill-to-Bill 300), coin acceptance and sorting modules (CAM 208), Newland printers and ELO monitors. One of the biggest highlights will be the ICS (Intelligent Coin System), an advanced coin handling device that enables payout of all coin denominations.

"Our new cash management technology offers an immediate solution to improve retailers in-store cash management, by reducing handling costs and increasing speed and accuracy," stated Vincent Saubaber, Executive Vice President of Retail & Transportation Sales EMEA. "Please visit us at EQUIPMAG to see how we can help you to focus more on your business and get a rapid and significant return on investment."

## About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement.
