Cash Handling Highlights from SUZOHAPP at Innotrans 2018

SUZOHAPP is pleased to welcome all attendees at Innotrans, which will take place in Berlin, Germany between the 18th and 21st of September. SUZOHAPP will be exhibiting at Booth 214 (Hall 2.1) featuring its wide product range and displaying its latest innovations in cash management technology for transportation and parking environments.

Here are some highlights from the SUZOHAPP booth:

- **The Intelligent Coin System (ICS)**

An advanced coin handling device which tackles the challenge of optimizing coin pay out in ticketing machines. The ICS enables payout of all coin denominations and its compact design makes it easier for manufacturers to incorporate into their solutions.

- **The CashComplete™ RCS-400 2.2 alongside the RCS-500**

This Recycling Cash Solution streamlines cash handling with automated till float creation, coin recycling, change facilities, and end of shift deposit and reconciliation. The new 2.2 version comes with a flexible system for different tills. Coupled with the CashComplete™ Connect software platform, this complete solution automates cash handling operations for complete visibility of the cash cycle, allowing users to retrieve real-time cash flow data via computer or mobile device.

- **The SCAN COIN CDS-820j**

The CDS-820j is a powerful self-service solution for bulk coin deposits, featuring a modern and intuitive user interface. It can be integrated with the CashComplete™ SDS-300 Smart Deposit Solution that provides a cost-effective method of securing banknotes.

A wide array of cash handling components will also be displayed at the SUZOHAPP booth. The biggest highlights will be the Bill-to-Bill note recyclers, the Comestero coin validators and the WGR coin handling carousel. Visitors will have the opportunity to learn more about the features of the SCAN COIN desktop solutions, the SC-8220 currency note counter and the DTC-9 coin sorter.

"At SUZOHAPP, every product we develop aims to simplify the end user experience and maximize operator value. We invite all attendees to visit us at Innotrans and discover how our offering – a complete cash management solution that includes everything from components to hardware and software - can add real value to their business and deliver measurable improvements to their performance," stated Vincent Saubaber, Executive Vice President of Retail & Transportation Sales EMEA.

About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement. SUZOHAPP's solutions include cash deposit, recycling, processing and payment systems as well as a broad range of self-service component technologies.
