SUZOHAPP to participate at ATMIA 'ATM & Payments Innovation Summit'

SUZOHAPP will be presenting at the upcoming ATMIA conference that will take place at the Eurostars Madrid Tower Hotel between the 17th and 19th of October.

The annual event is organized by ATMIA, the trade association representing the entire global ATM industry, bringing together over 500 ATM & Payments professionals. The theme of this year's conference is 'Seeing The Future, Today' and the presentations will focus on the creation of a better and more profitable future for the ATM and Payments Industries.

The ATMIA conference will be an ideal opportunity for SUZOHAPP to present the Crèdit Andorrà success story, a project started in 2008. Carlos Durán, Solutions Managing Director at SUZOHAPP Spain, will present '*A successful coin branch transformation model in Andorra, a crucial part of the local cash cycle*' (19/10/2018 16:25-16:45) as a conference speaker together with Josep Escoriza, IT & Organization Division Director, Crèdit Andorrà.

"Cash is a reality that the banking sector tends to see as a drawback - a cost without payback. Cash can become an instrument for customer acquisition, loyalty and business generation, through automated cash management technology," stated Mr. Durán. "Our new SCAN COIN CDS-9R is the most advanced solution which offers a recirculation of coins and notes amongst the branch clients. It is driving banking transformation further."

SUZOHAPP will exhibit at Booth 5 and will showcase a selection of SCAN COIN cash processing solutions and its advanced software platform, CashComplete™ Connect. The attention will be focused on the innovative **CDS-9R**, the world's first coin and note recycler for private and retail banking. This self-service cash solution is a convenient one-stop-shop for both bulk cash deposit and dispense. It offers the most secure, reliable and effective way to handle self-service cash transactions, removing the need for costly coin roll dispensers and separate coin deposit machines. "We are excited to present our CDS-9R which is a completely new banking solution for self-service cash recycling. It has been developed for the modern bank lobby offering best-in-class customer service," commented Walter ter Rahe, Vice President of Sales Banking EMEA.

Another highlight at the SUZOHAPP booth will be the **CRC-2610F**, the next-generation coin roll dispensing system. This new advanced solution is an automated dispenser for coins and/or banknotes of all denominations. It combines maximum flexibility and adaptability, providing a high efficiency level for managing cash.

SUZOHAPP will also be present at the Prosegur booth (#10/11) with its SCAN COIN **CDS-9** cash deposit system which represents a full service coin and note handling solution.

About SUZOHAPP

SUZOHAPP is a technology company providing software and hardware for cash handling automation and self-service solutions to more than 25,000 customers throughout the world. SUZOHAPP's technology enables automation for customers operating in a variety of end markets, including retail, transportation, gaming, banking, vending and amusement.
