

SUZOHAPP – a leading technology company with over 50,000 gaming, amusement, sports betting, lottery and bingo products for operators and OEMs – will be exhibiting at ICE on **booth N3-130**

SUZOHAPP to showcase product innovations at ICE

At ICE, SUZOHAPP will be showcasing the most complete range of components on the market today, including monitors, locks, printers, scanners, bill and coin handling, push buttons, and more. A key player in the gaming industry for decades, SUZOHAPP uses its deep expertise and strong engineering team to deliver technological innovations that add significant value to its customers.

One such innovation is the new **VisionPro** line of LCD monitors which now includes edge-lit and 4K UHD models, narrow border touch and Thru-Glass capabilities, allowing touchscreens to work through 9mm of tempered glass. Also on display will be the new drop-in replacement E-PRL electronic reprogrammable lock which enables remote authorization, traceability, and the benefit of never again needing to change locks when a key is lost or an employee dismissed. The Dynamic **Panel Systems** (DPS) feature the latest advancements in player interfaces, offering all the adaptability of touch screens while maintaining the satisfying feel of mechanical pushbuttons that keeps users engaged.

Further innovations to be shown at this year's ICE include the Newland line of scanners, new printer models from Nanoptix and Custom, and POS solutions for lottery and sport betting.

"The depth and breadth of our product line is unmatched – we can provide every component operators and OEMs need to run their businesses efficiently," said Mike Sigona, SUZOHAPP's Business Development and Global Gaming Product Manager. "Even more, we deliver the kind of value-added innovation that our customers can use to drive demand for their offerings."

Also at ICE, SUZOHAPP will display its new, award-winning components website which offers comprehensive product information, organised in an intuitive and easy-to-navigate format.

"Our goal at SUZOHAPP is to simplify the sourcing process for our customers," said Sim Bielak, SUZOHAPP's President of Global Gaming & Amusement. "This new website advances our goal by giving our customers easy access to the product information they need when they need it."
