

Suzohapp receives the Innovation Award for cash recycling technology at ATMIA Conference

At the recent ATM and Cash Innovation Conference in London, Suzohapp took home the Silver Innovation Award for its innovative Cash Recycling Technology, thanks to Scan Coin Solutions.

Walter ter Rahe, vice president of sales banking EMEA, said: "We are honoured to

receive this prestigious award as recognition of our ongoing dedication and commitment to the industry."

Jim Anderson, managing director of Scan Coin UK, said: "This award is an amazing achievement for us. We are always focused on bringing innovations to the industry and our Recycling Cash Solutions ensure a quick return on investment through improved cash management."

At the event, a selection of Scan Coin cash processing solutions and their sophisticated software platform were displayed. The biggest highlight was the innovative CDS-9R, the world's first self-service coin recycler for public environments, which offers the most secure and effective way to handle cash transactions, removing the need for costly coin roll dispensers and separate coin deposit machines.

Mr ter Rahe concluded: "The CDS9-R transforms customers' coin handling into a completely automated process and minimises costs to the banks. Thanks to our new solution, you can take control of your cash through an efficient cash cycle in all areas of your business, from internal cash handling to CIT operations."
